

Teaching Math 101

Emily Dautenhahn and Benjamin Thompson

9/21/2022

Outline

- *We've come up with several important questions related to teaching math.*
- *We'll discuss each of these questions in small groups and then together.*
- *These are by no means the only important questions to ponder.*

Goals

We hope that by the end of today you will have:

1. Reflected upon teaching practices with others.
2. Gained some ideas about how to adapt/improve your teaching practices.
3. More confidence in teaching!

What are some learning activities that are best suited to the classroom environment?

What is a good way to structure class?
Which portions of class might students pay
more attention to?

How do you know you're doing well as a
teacher?

How can a TA / instructor prepare for class?

What makes a good question to ask the class?

How can a TA / instructor learn the names of their students?

How can a TA / instructor navigate course policy?

What are some strategies to deal with student emails?

Thank you for participating!
